

# Decodable Books and Catch-up Reading Options

**Our early literacy offerings are informed by the Science of Reading and can be used to support reading instruction, practice, and engagement. Used in order, they provide a progressive scope and sequence that builds a student's confidence in their ability to read independently.**

Decodable books are a critical part of any literacy program, used alongside any phonics curriculum a structured way to practice phonics skills.

In addition to decodable books, older students whose learning was interrupted need books that grab their interest and help them practice reading without feeling defeated. Our high/low books help these catch-up readers build fluency and foster a love for books.

## How to use decodable books to support early literacy

### Step 1: Learn Letter Sounds

Alongside explicit reading instruction, students need practice connecting letters and the sounds they make to the written word.

### Step 2: Read Decodable Books

As students progress, they need access to books that allow them to become proficient in decoding, comprehending, and writing to solidify their learning.

### Step 3: Practice Reading to Develop Fluency

Like other skills, things like decoding, letter knowledge, and word reading decay without practice. Students need engaging books to keep their skills sharp.
